TENDERNEST · AI DEVFEST 2026

Tender papers in. One clean package out.

Tender requirements in. One checked, ordered package PDF out — all in your browser.

🔒 Your files never leave this computer. Nothing is uploaded to any server.

01 STEP 1 Tender requirements

📄 Open requirements.json

✅ Load sample pack

TENDER ID
T-2026-0417

SUBMISSION DEADLINE
2026-10-20

TENDER TITLE
Supply of IT Equipment

PROCURING ENTITY
Directorate of Sample Services

BIDDER
Meghna Tech Sol

10 documents required (8 mandatory)

02 STEP 2 Upload PDF files

❌ "company_logo.png" is not a PDF file added. Only PDF files are allowed.

✅ 10 file(s) added.

⚠️ Duplicate files found: files with same name are marked "Duplicate".

✅ Sample pack loaded. Some files are missing.

PROBLEM

Tender Document
Package Builder

DATE

2026-10-06

The whole system, at a glance

TenderNest answers one question: given this tender’s requirements and these PDFs, is the package complete, valid and correctly ordered — and if so, download the submission PDF now? It runs as a static site with no server, no database and no secrets. The main workflow works fully offline from any API.

9/9

Main tasks 4.1–4.9 done and shown in the app

8/8

Bonus tasks shipped, from index page to AI help

17

Pages in the sample package: cover, index, 15 doc pages

0

Backend services, serverless functions or databases

6/6

Hidden problems in the sample pack found by the app

5

Statuses, exactly as in §5, updated after every change

2

Full UI languages, plus Bangla digits & Bangla PDF index

9 pass

Unit tests on the pure logic layer (`npm test`)

01

THE PROBLEM

Small paper mistakes lose whole bids

Every tender asks for a set of documents in a fixed order: trade license, TIN and VAT certificates, bank solvency, experience, proposals. Some are mandatory, some optional, some must still be valid on the deadline. Staff assemble these bundles by hand, and one missing, expired, duplicated or misplaced file can get the bid rejected.

What goes wrong by hand

MISTAKE

COST

A mandatory document is missing

× Rejected

An expired license is attached

× Disqualified

Documents in the wrong order

! Reviewer friction

The same certificate scanned twice

! Wasted pages

No page numbers or index

! Hard to verify

THE TENDERNEST ANSWER

Treat the checklist as **data**, and the browser as a **private workshop**.

1 Validate

2 Upload

3 Match

4 Check

5 Generate

6 Download

Generate stays disabled while anything blocks, and the app lists every reason in plain words, in English or Bangla.

Six traps hidden in the sample pack, and how the app catches each one

Not a PDF

company_logo.png

Rejected by extension **and** by the %PDF- magic bytes, with a clear bilingual message.

Duplicate

experience_cert.pdf ≡ experience_cert (1).pdf

Same SHA-256, so both are flagged and they can never be matched to different documents.

Expired

trade_license_2025.pdf

Valid until 2025-06-30, before the 2026-10-20 deadline. Auto-match picks the 2026 license instead.

No text

scan_0042.pdf

An image-only scan with a meaningless name. Matched by hand to Signed Declaration after preview.

Expiry needed

Trade License · Bank Solvency

Dates found in the PDF text are offered as one-click suggestions and never applied silently.

Not provided

Audited Financial · Manufacturer's Auth.

Optional with no file. They never block, and they are skipped in the package.

02

Every requirement, **ticked**

MAIN TASKS · PROBLEM STATEMENT §4

§	TASK	HOW TENDERNEST DOES IT
4.1	Load the list	Validates <code>requirements.json</code> , shows tender meta, sorts by <code>order</code> (stable)
4.2	Upload files	Multi-file & drag-drop; name, pages, size, thumbnail; non-PDF rejected; remove / remove all
4.3	Match files	Strict 1:1 by dropdown or drag; reassigning moves the match; undo per row and Ctrl/⌘+Z
4.4	Expiry dates	Date field only when <code>has_expiry</code> and matched; date found in PDF offered as suggestion
4.5	Check everything	One of 5 statuses per row, recomputed on every change; summary counts
4.6	Duplicates	SHA-256 content hash; badge in file list; <code>canMatch</code> blocks cross-document use
4.7	Make package	Generate disabled while blocked; reason list per document
4.8	Download	<code><tender_id>_Package.pdf</code> plus in-app preview
4.9	Two languages	Whole UI EN ⇄ বাংলা; <code>title_bn</code> / <code>title_en</code> ; Bangla digits

PACKAGE RULES · §6

- 6.1 English cover: ID, title, entity, bidder, deadline, made-on date, ordered doc list ✓
- 6.2 Docs after cover by `order`, all pages in original order, optional gaps skipped ✓
- 6.3 `T-2026-0417 | Page X of Y` on every page, cover included ✓
- 6.4 Content scaled into the band above the footer, so it is never covered ✓

BONUS TASKS · §7 — 8 OF 8

- Index page with start pages ✓
- Seal / signature PNG on chosen pages ✓
- Checklist export (CSV, opens in Excel) ✓
- Save & reopen (IndexedDB + .json) ✓
- Bangla shaped correctly on PDF index ✓
- Auto-match by names (+ PDF text) ✓
- Damaged / password PDFs handled safely ✓
- AI help with the user's own key ✓

RULEBOOK

Frontend only

no server, no Firebase

LIMITS

30 files · 50 MB

enforced on upload

SECRETS

None in repo/build

AI key: session only

BROWSER

Latest Chrome

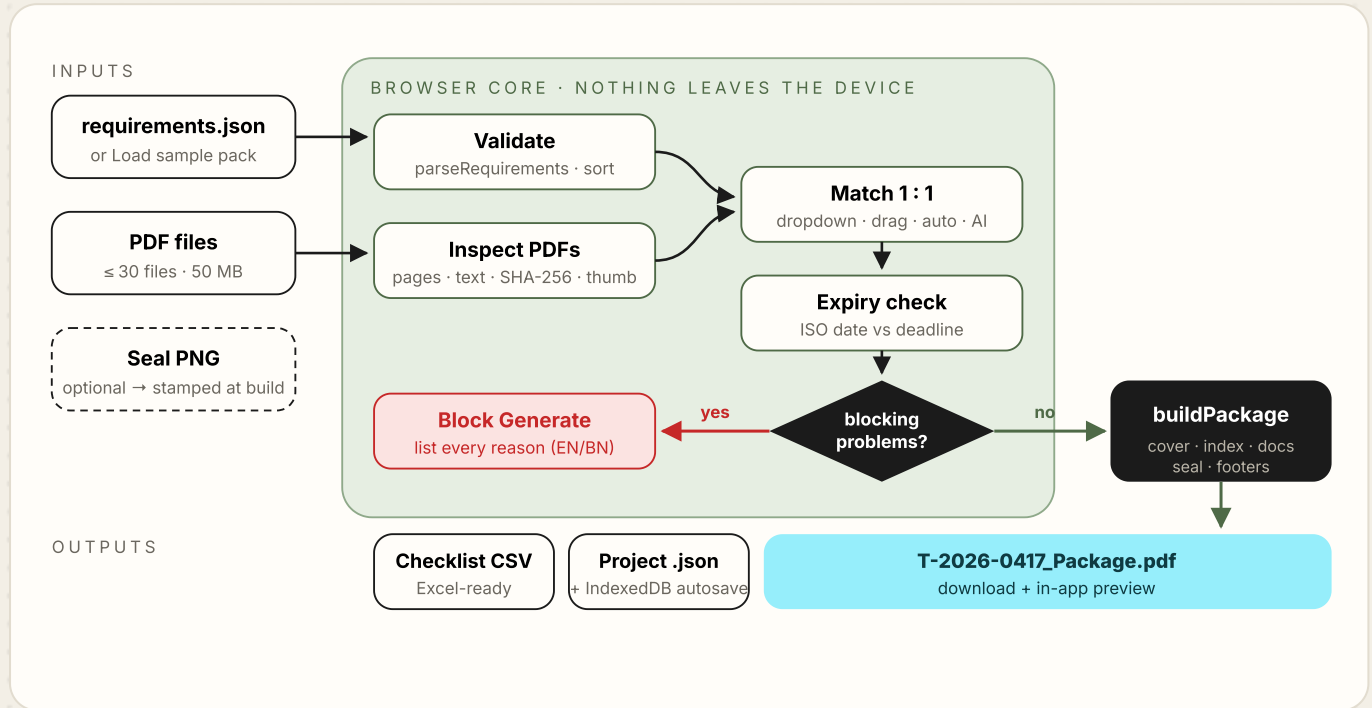

tested EN + BN

SUBMIT

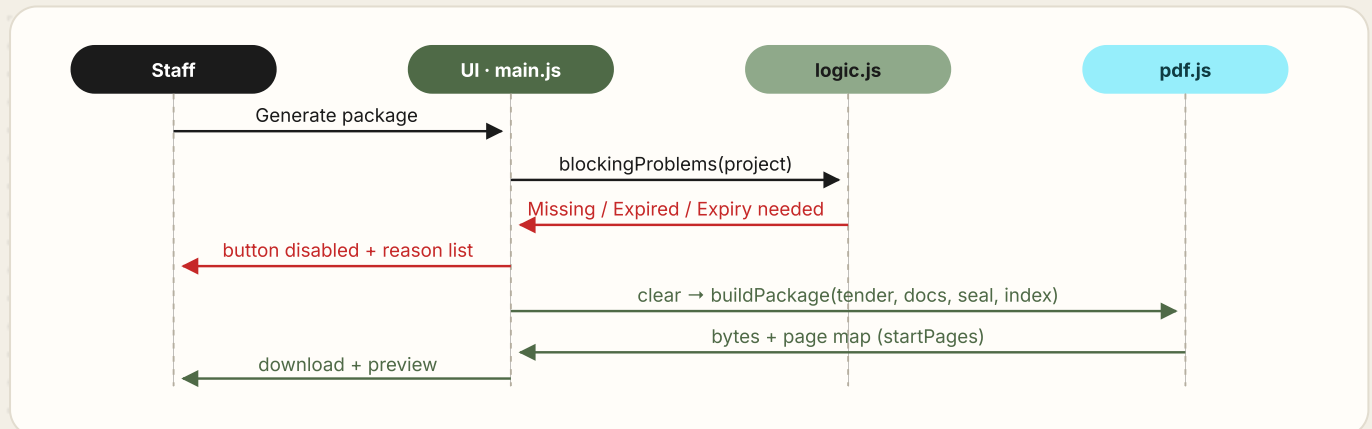

output/ + screenshots/
both committed

03 One session, start to finish

Four guided steps on one page. A left rail (desktop) or bottom tab bar (mobile) shows each step's live state, so the user always knows what is left to do.

What happens when you press Generate

01 Tender

Open `requirements.json` or the sample pack. Bad files show coded errors.

02 Files

Drop PDFs. Thumbnails, page counts, duplicate badges, and safe rejects.

03 Match

Dropdown, drag, auto-match, or AI. Confirm expiry dates. Undo any time.

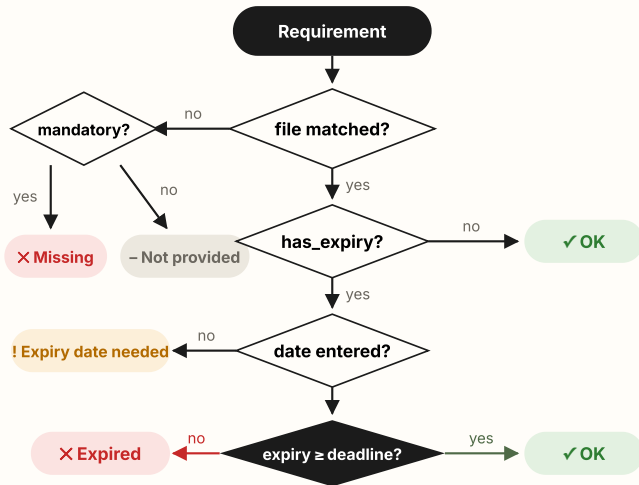

04 Package

Index, seal, CSV, save. Generate unlocks only when nothing blocks.

04

Exactly one status, always right

Status is a pure function, `statusOf(req, matches, expiries, deadline)`, in `src/logic.js`. It has no DOM and no dates with time zones, so judges with an unseen pack get the same answer every time.

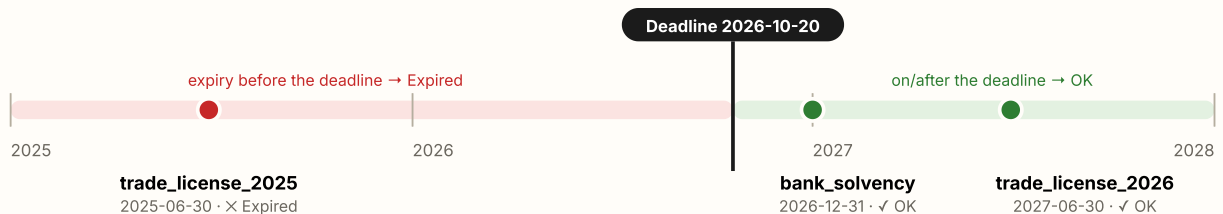

The five statuses (\$5)

STATUS	WHEN	BLOCKS
× Missing	Mandatory, no file	Yes
! Expiry needed	Expiry doc matched, no date	Yes
× Expired	Expiry before deadline	Yes
- Not provided	Optional, no file	No
✓ OK	Matched and valid	No

*Deadline-day rule: expiring **on** the deadline is still OK. Dates compare as ISO strings (`exp < deadline`), so there is no time-zone drift.*

Changing a match clears the old expiry, because a new file's date must be confirmed again.

Expiry dates from the sample pack against the deadline

05

From 11 raw files to 8 / 8 green

FILE	PAGES	SHA-256 (FIRST 8)	WHAT THE APP DOES	FINAL ROLE
01_financial_proposal.pdf	2	d3278fe1...	Auto-matched by name	✓ R09
02_technical_proposal.pdf	6	66908140...	Auto-matched by name	✓ R08
03_tin_certificate.pdf	1	db133c01...	Auto-matched (TIN ↔ tax)	✓ R02
04_vat_certificate.pdf	1	6045c2f4...	Auto-matched (VAT ↔ BIN)	✓ R03
bank_solvency.pdf	1	5c4271f7...	Matched; expiry 2026-12-31 suggested	✓ R04
experience_cert.pdf	2	91cb4ab6...	Duplicate; the original is preferred	✓ R05
experience_cert (1).pdf	2	91cb4ab6...	Same hash → flagged, never reused	🔒 Duplicate
trade_license_2025.pdf	1	23cc7ed1...	Expired 2025-06-30 → not chosen	Unused
trade_license_2026.pdf	1	f4c26884...	Valid to 2027-06-30 → preferred	✓ R01
scan_0042.pdf	1	33b05cba...	Image-only, previewed, matched by hand	✓ R10
company_logo.png	—	not PDF	Rejected with a clear message	✗ Rejected

Status of the 10 requirements at each step

1 • Sample loaded
nothing matched yet

8 Missing

2 N/P

2 • After auto-match
7 suggestions accepted

5 OK

2 Expiry

1

2 N/P

3 • Expiry + hand match
ready to generate

8 OK • Generate enabled

2 N/P

✓ OK

! Expiry date needed

✗ Missing

– Not provided (optional, never blocks)

STEP 1
Click **Load sample pack**: 10 PDFs in, the PNG rejected, twins flagged.

STEP 2
Auto-match fills 7 rows and skips the expired 2025 license.

STEP 3
Use it on the 2027-06-30 and 2026-12-31 expiry suggestions.

STEP 4
Drop `scan_0042.pdf` on Signed Declaration, then **Generate**.

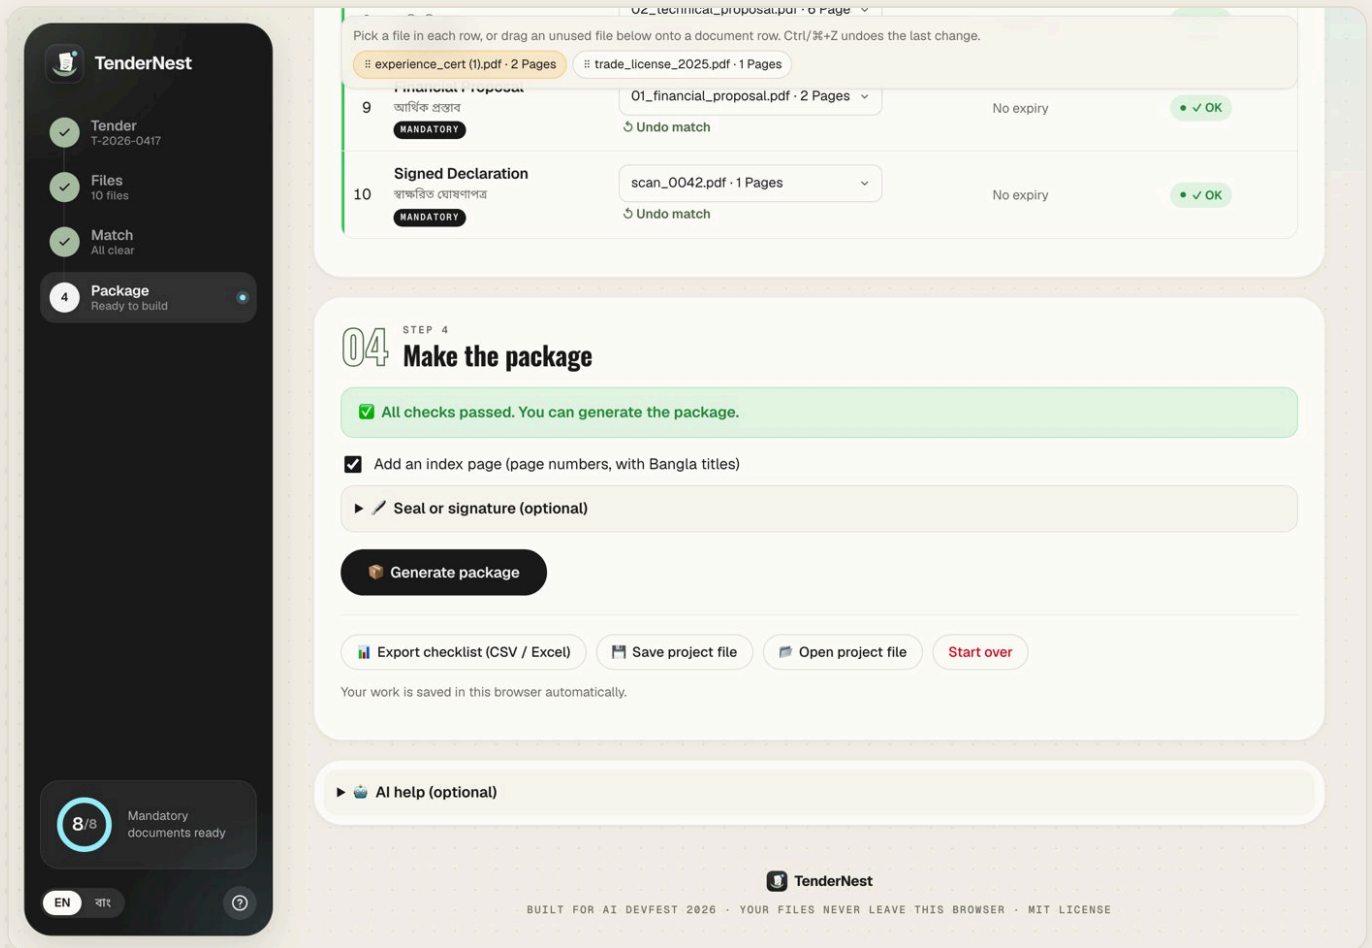

TENDERNEST • SAMPLE PACK

261-15-001

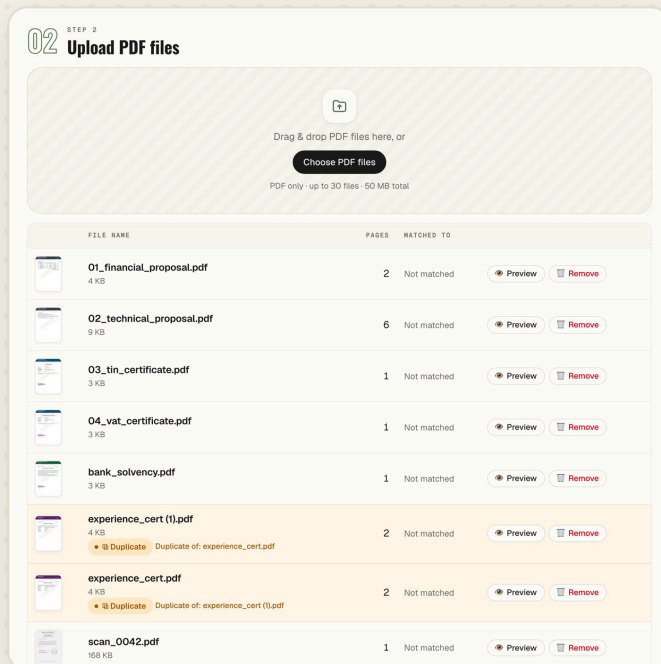

07

06

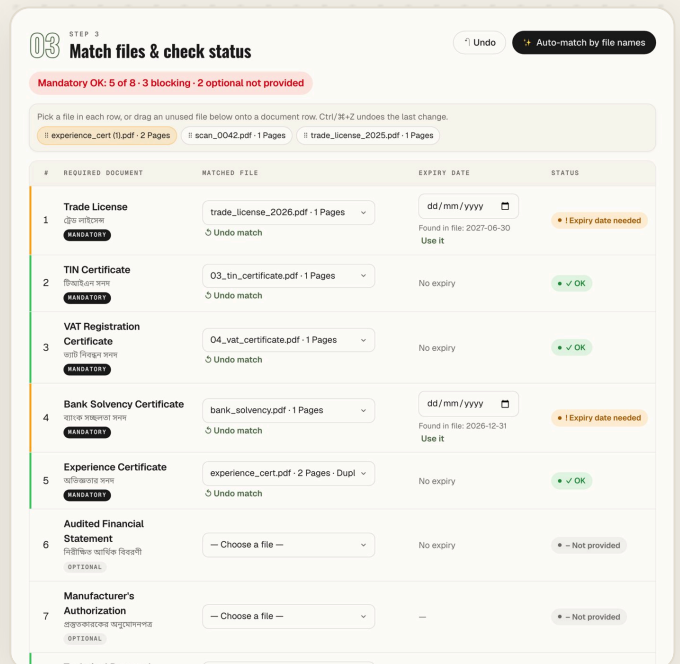

Calm, clear, status-first

Ready state. The dark step rail shows all four steps done and the 8/8 mandatory ring; step 4 reports “All checks passed” and Generate is unlocked.

Step 2 · Upload. Thumbnail, pages, size, and match state for each file. Twins get a **Duplicate** badge.

Step 3 · After auto-match. Coloured row edges and badges; the expiry found in each PDF is shown with **Use it**.

06

Blocked, explained — then ready

04 STEP 4 Make the package

⚠ The package cannot be made yet. Fix these first:

- Trade License — Expiry date needed: enter the expiry date
- Bank Solvency Certificate — Expiry date needed: enter the expiry date
- Signed Declaration — Missing: mandatory document has no file

☒ Add an index page (page numbers, with Bangla titles)

➤ Seal or signature (optional)

Generate package

Export checklist (CSV / Excel) Save project file Open project file Start over

Your work is saved in this browser automatically.

04 STEP 4 Make the package

✅ All checks passed. You can generate the package.

☒ Add an index page (page numbers, with Bangla titles)

➤ Seal or signature (optional)

Generate package

Export checklist (CSV / Excel) Save project file Open project file Start over

Your work is saved in this browser automatically.

Blocked. Generate is disabled and each blocker is listed by document name with its reason.

Ready. All checks pass, so Generate is enabled. Index page, seal, CSV, and project save sit alongside.

03 STEP 3 Match files & check status

Undo

Auto-match by file names

Mandatory OK: 8 of 8 · 0 blocking · 2 optional not provided

Pick a file in each row, or drag an unused file below onto a document row. Ctrl/⌘+Z undoes the last change.

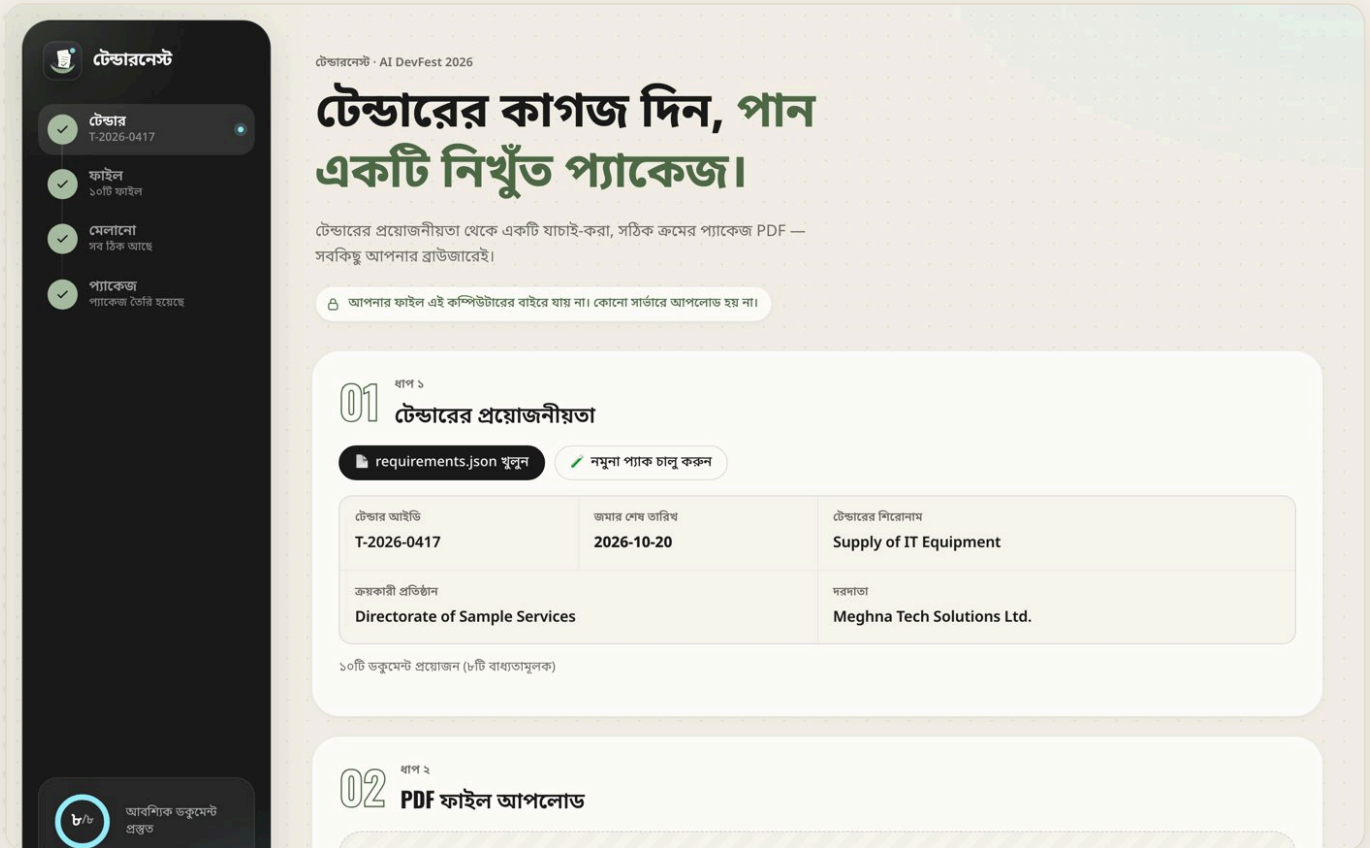

experience_cert (1).pdf · 2 Pages

trade_license_2025.pdf · 1 Pages

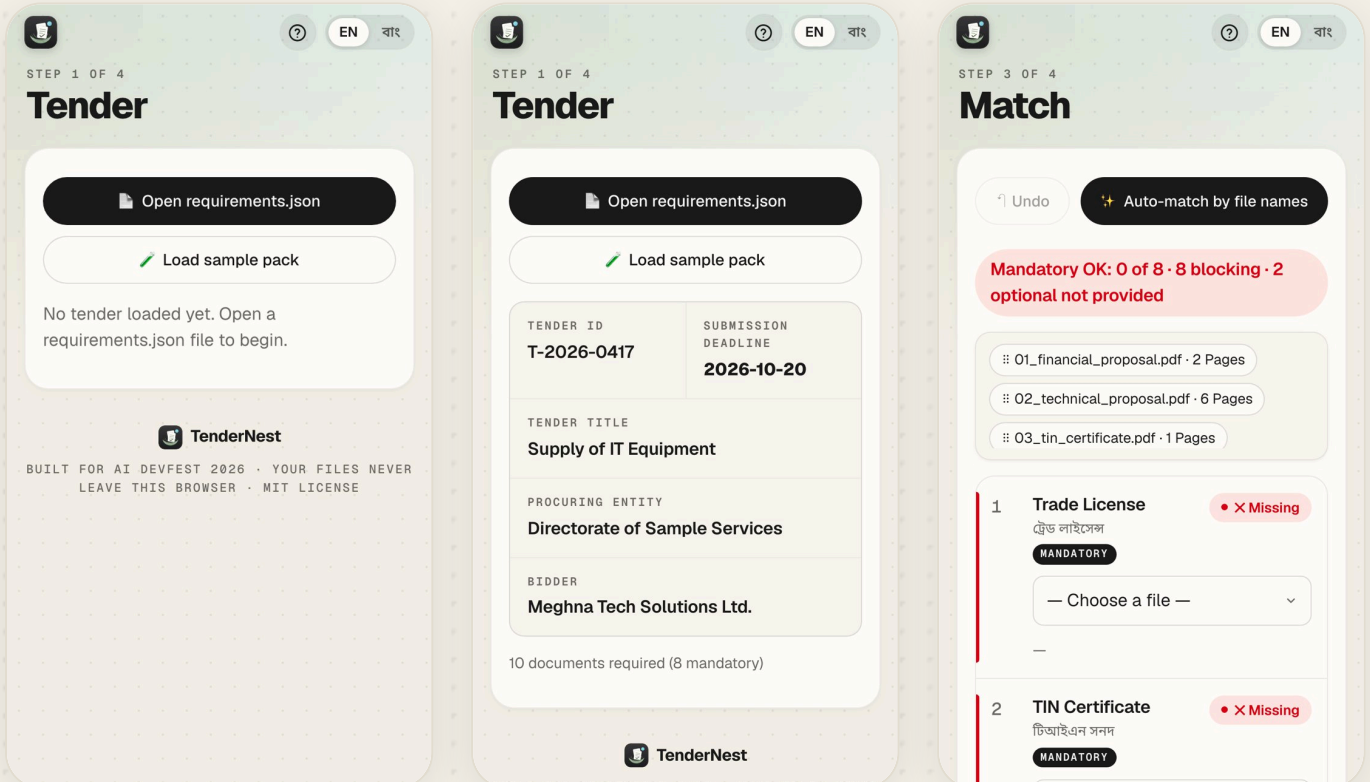

#	REQUIRED DOCUMENT	MATCHED FILE	EXPIRY DATE	STATUS
1	Trade License ট্রেড লাইসেন্স MANDATORY	trade_license_2026.pdf · 1 Pages Undo match	30/06/2027	✓ OK
2	TIN Certificate টিআইএন সনদ MANDATORY	03_tin_certificate.pdf · 1 Pages Undo match	No expiry	✓ OK
3	VAT Registration Certificate ভ্যাট নিবন্ধন সনদ MANDATORY	04_vat_certificate.pdf · 1 Pages Undo match	No expiry	✓ OK
4	Bank Solvency Certificate ব্যাংক সচ্ছলতা সনদ MANDATORY	bank_solvency.pdf · 1 Pages Undo match	31/12/2026	✓ OK
5	Experience Certificate অভিজ্ঞতার সনদ MANDATORY	experience_cert.pdf · 2 Pages · Dupl Undo match	No expiry	✓ OK
6	Audited Financial Statement নিরীক্ষিত আর্থিক বিবরণী OPTIONAL	— Choose a file —	No expiry	— Not provided
—	Manufacturer's Authorization			

All green. 8 of 8 mandatory documents OK; the two optional ones show **Not provided** and do not block.

06 Two languages, any screen

বাংলা mode. All labels, statuses, errors, help, and confirms switch, with Bangla digits and `title_bn` document names. The choice is remembered.

Mobile · start. Large touch targets, compact header.

Mobile · loaded. One step per screen with a floating tab bar.

Mobile · match. Rows become cards; the tab badges count blockers.

output/ . 17 pages: English cover, bilingual index, then 8 documents in order

i18n.js	333
pdf.js	297
logic.js	270
test	101
storage.js	83
logo.js	60

3,097 lines in total, small enough to explain line by line. Vanilla JS modules with `idiomorph` for flicker-free DOM morphing; no framework.

Vite 8

pdf-lib 1.17

pdfjs-dist 6.4

idiomorph

@anthropic-ai/sdk

node:test

PDF pipeline · `src/pdf.js`

INGEST · PER FILE

- Check the extension and the `%PDF-` magic bytes (`looksLikePdf`)
- `inspectPdf`: page count, best-effort first-page text, detected expiry
- `sha256` via Web Crypto for duplicates and project integrity
- `thumbnail` of page 1 on a canvas; preview in a modal
- Encrypted or damaged files → clear message, never a crash

BUILD · `BUILDPACKAGE()`

```

PDFDocument.create()
├─ drawCover  A4 · Helvetica · auto-fit list
├─ index PNG  canvas @300dpi · Bengali shaping
├─ for doc in order:
│   └─ embedPages → placeShrunk (~97%)
├─ seal PNG   pages "all" | "1, 3-5" · pos · size
└─ drawFooter "ID | Page X of Y" on all
  
```

09

Matching that is smart but safe

Auto-match scoring

For each unmatched requirement × unused file,
`suggestMatches` scores how well the file fits the title:

```
score = max(name, 0.9 × pdfText)
+0.2 if detected expiry ≥ deadline
-0.3 if detected expiry < deadline
-0.01 for "(1)" / "copy" twins
accept if ≥ 0.5 · greedy, best first
```

Token overlap uses a stop-word list and a synonym map, so different wording for the same document still matches:

TIN ↔ tax · taxpayer · etin

VAT ↔ BIN · mushak

MAF ↔ manufacturer · OEM

declaration ↔ affidavit · undertaking

financial ↔ price · BOQ

license ↔ licence · TL

Image-only scans have no text, so they are never guessed. A wrong guess is worse than an honest blank.

Duplicates by content (4.6)

`duplicateGroups` buckets files by SHA-256. `canMatch` refuses a file whose twin is already on a *different* requirement (`dup_conflict`), and auto-match marks a whole hash as used.

Expiry detection

`detectExpiry` finds a keyword ("valid until", "expiry date", "validity"...) and reads the next 160 characters for:

2027-06-30

30 June 2027

30/06/2027

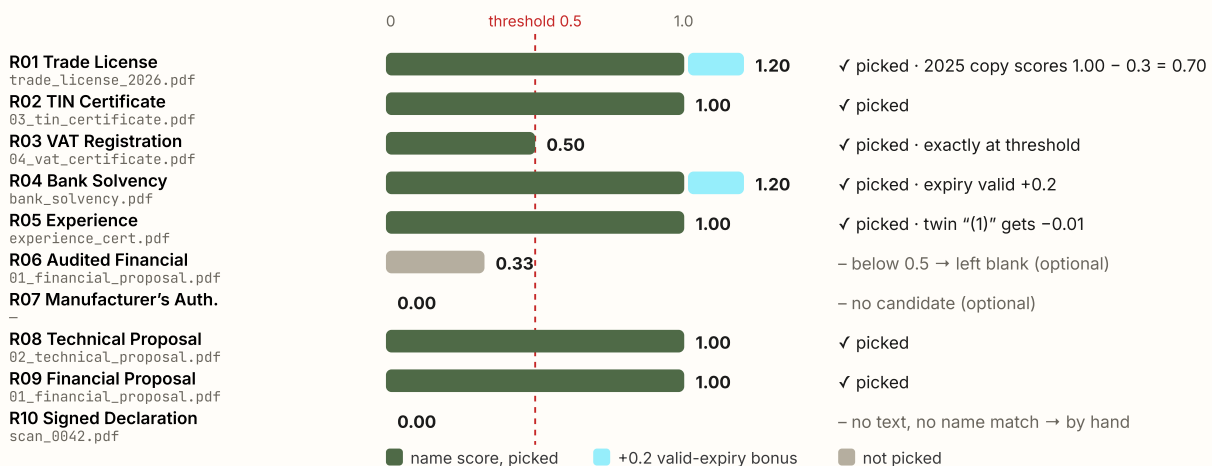

Shown as "Found in file: ... **Use it**" and never applied automatically. The human confirms.

Optional AI assist

The user pastes their own Anthropic key (session only, clearable). Claude suggests matches from titles, file names, and text snippets. Suggestions go through the same `applyMatch` rules.

Worked example: real scores on the sample pack

from `scoreName()` on file names

Private, bilingual, made for real offices

Security & privacy model

CONCERN	MITIGATION
Tender documents leaking	All parsing and building in-browser; no upload at all
Contest backend ban	Static <code>dist/</code> only; no serverless, no Firebase
Secrets in repo or build	None. The AI key is user-supplied and session-scoped
XSS via file names	<code>esc()</code> on every interpolated string
Malicious or damaged PDF	Sandboxed JS parsers; errors caught → message
Accidental data loss	Confirm dialogs, Undo history, IndexedDB autosave

Two languages, done properly

E N

Expiry date needed

Mandatory OK: 8 of 8

B N

মেয়াদের তারিখ

দরকার

আবশ্যিক ঠিক আছে: ৮টির মধ্যে ৮টি

- `i18n.js` holds **every** visible string in `en` and `bn`
- `t(key, vars)` interpolation · `num()` → Bangla digits
- `reqTitle(r)` picks `title_bn` / `title_en`
- Language choice remembered in `localStorage`

Accessibility & motion

- Status is never colour alone: icon + word + coloured row edge
- Keyboard-reachable actions; `aria-pressed`, `aria-current`, labelled controls
- Dropdown matching works on touch; drag is an extra for mouse users
- `prefers-reduced-motion` skips the intro and entrance animations
- Plain-language errors and an in-app “How to use” panel

Design language

The mark: a **woven nest** (documents are kept, not scattered), **two sheets with a check** (completeness), and a **cyan status dot**. An animated intro assembles it on launch.

Tested, deployed, committed in the open

Unit tests · `npm test`

✓ 9 / 9 pass · 36 ms

- ✓ Sample requirements load and sort by order
- ✓ Bad requirements are rejected with clear codes
- ✓ Status rules, including the deadline-day case
- ✓ Optional documents never block; mandatory ones do
- ✓ Duplicates by content cannot go to different documents
- ✓ Matching is 1:1; moving clears old match & expiry; undo works
- ✓ Auto-match on the sample file names
- ✓ Expiry detection (ISO, long-form, numeric)
- ✓ Page-list parsing ("all", "1, 3-5") and CSV escaping

Also verified by hand: the full sample-pack path to `output/`, and a 9-state screenshot suite (EN, BN, blocked, ready, generated, drag, confirm); plus a scripted Chrome end-to-end run: **27 / 27 checks pass** (p. 16).

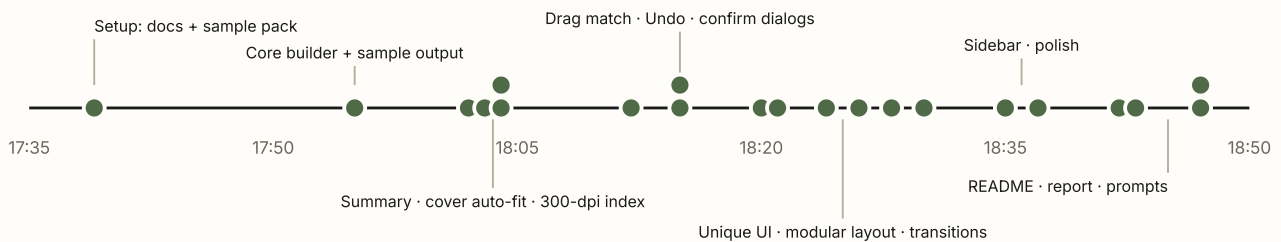

RUN IT

```
npm install
npm run dev      # localhost:5173
npm test         # 9 logic tests
npm run build    # static dist/
npm run preview
```

Deployment

- `vite build` → fully static `dist/` (~2.6 MB)
- GitHub Actions workflow → HTTPS at **tendernest.devabir.me**
- No env vars or secrets needed for the core features
- Node 20.19+ / 22+, latest Chrome

Build timeline · 21 commits, 6 Oct 2026

Small, frequent commits, well inside the playbook's 30-minute rule (§8.3). Each message records what changed and the AI prompt used (§8.4).

11

Sample pack, clicked through in Chrome

A scripted Chrome run (Playwright) loads `requirements.json`, uploads every file, matches, enters expiry dates (deadline **2026-10-20**; same day = OK), tries to break the gate, switches language, then generates and checks the PDF. 6 Oct 2026 · **14 s** · 0 console errors.

Package PDF

CHECK	RESULT	NOTE
File name	✓ Pass	<code>T-2026-0417_Package.pdf</code>
Cover fields (EN)	✓ Pass	All 6 fields + ordered doc table
Docs in order	✓ Pass	R01-05, R08-10 on pp 3-17
Skip empty optionals	✓ Pass	R06, R07 omitted
Footer	✓ Pass	<code>T-2026-0417</code> Page N of 17

FOLLOW-UPS (NONE BLOCK)

1) Label reads "1 Pages"; should be singular. 2) Auto-match can't place `scan_0042.pdf` (no text, generic name), so R10 is matched by hand. 3) Index page is an image, so its text can't be selected (p. 17).

12

Limits, assumptions, and how AI was used

Known limitations

- Password-protected PDFs are refused; remove the password first
- Image-only scans cannot be auto-matched; match them by hand
- Expiry detection is a suggestion and depends on readable PDF text
- Page content is scaled slightly (~97%) to keep the footer clear
- Drag-and-drop needs a mouse; touch users use the row dropdown
- AI help needs a user key and network; everything else works without it

Assumptions recorded for judges

- The cover's "date made" is the generation date (YYYY-MM-DD)
- The 50 MB limit applies to all uploaded files together
- Expiry equal to the deadline is **OK** (\$5, stated explicitly)
- The sample pack in `public/sample-pack/` is the official set, unchanged
- Ties in `order` keep their file order (stable sort)

AI disclosure

USE	TOOL	NOTES
Planning & implementation	Claude / Cursor agents	From the rulebook and sample pack; prompts recorded in commits
Tests, UI polish, branding, docs	Claude	Reviewed and run locally
Screenshots & sample package	Playwright / browser tooling	Generated from the real app
In-product assist (optional)	Anthropic API	User-supplied key only; never bundled

Most useful prompt. *"Read the contest materials carefully, make a solid plan, then build and ship a working solution that fully follows the rules and uses the required sample pack. Stay fully rule-compliant. Prefer choices that maximize score under the official scoring criteria. If something is ambiguous, state your assumption and choose the safest compliant option. Do not ignore or replace the sample pack."*

WHAT JUDGES WILL CHECK · \$10

**Right status**

Pure, tested rules for any unseen pack
